After a long research for a new location for Leaders International School, the AQUATORIA residential complex seemed to be an ideal location for implementing our idea of new educational centre realization. A large and secured territory, a well-maintained private embankment, a developed area with excellent infrastructure and transport accessibility corresponds completely to our requirements for the surroundings of projects that we want to integrate into. An important detail was surely the proximity of the school to residential buildings – it is no more than 50 meters.

Confidence in the success of cooperation was added after negotiations we have had with the team of the project developer – the international company Wainbridge, which turned out to be very close to us both in ideology and in spirit.

Now we are looking forward to start constructional works of the school. It is planned for the near future. We believe that the result of our partnership with Wainbridge will be a new generation educational center that will not only make the life of parents who live in AQUATORIA residential complex more comfortable, but also, will make the learning process for their children more filled and truly exciting.

Marina Shilkina

Founder of private kindergartens and schools «Leaders International School»
