IND architects

Company's professionalism, hardworking, deep understanding of the industry, desire to predict the trends of modern life and to meet –customer’s values and desires are important qualities that stand to succeed. We are very impressed with how competently Wainbridge is able to combine these qualities in working on its projects.

For AQUATORIA residential complex, we have created a unique concept for the embankment, and we are very glad to be involved in such a large-scale and modern project.

Due to non-standard approach of Wainbridge, the desire to be one step ahead of the market, Company's understanding of such an obvious modern necessity as new technologies integration has allowed us to develop and to approve the concept of a unique environment for the complex. The environment where future residents can enjoy comfortable life mixing busy work days and inner harmony and being in the center of nature at the same time.
